## Introduction

Thanks for purchasing Netac iMuve-shot (P100). P100 is a new type of portable media player, which perfectly combines digital video & audio playing, photo browsing, game, E-Book, FM Out, video record and MIC recording, etc.

## Features

- A) Support FM transmission
- B) Support video files as ASF
- B) 1300K pixels photographic lens
- C) Support MP3 and WAV audio files
- D) Support multiple sound modes and playback modes
- E) Lyric (LRC file) displays synchronously
- F) Support photo browse
- G) Support game function
- H) Support E-Book browse
- I) Support Video and MIC recording
- J) Support calendar browse
- K) Built-in loudspeaker

- L) Support SD/MMC Card
- M) User-defined power off
- N) Effectively prevent misoperation with **HOLD** switch
- O) No driver installation required (except on Windows 98/98SE)
- P) Firmware upgrade

## Usage on the Computer

Connect P100 with the computer through USB cable, connect standard port of USB cable with the computer, mini port with P100. After being connected, the screen of P100 would display as following:

Fig. 2.1

## Driver Installation

Please install driver before using P100, if your system has not installed it previously on Windows 98/98SE. The installation steps are as the following:

- 1) Boot your system on Windows 98/98SE.

- 2) Insert the Installation CD into CD-ROM.
- 3) Connect P100 with the computer through USB cable, system would find an USB device automatically. "Add New Hardware Wizard" dialog would appear, click "Next" button to continue.

- 4) Please select "Search for the best driver for your device. (Recommended)", and click "Next" button to continue.

## iMuve-shot

- 5) Wizard shows where to locate P100 driver. Only select "CD-ROM". Click "Next" button to continue.

- 6) Please click "Next" button in the following steps and click "Finish" button in the last step to finish the installation.

## Data Transferring

- 1) Boot your computer, connect P100 with the computer.
- 2) The screen of P100 would display as "Fig. 2.1" to prompt the connection status after being connected.

## Netac

**Windows 98/98SE/Me/2000/XP:** Double click "My Computer", you would find two new icons named "Removable Disk" (Fig. 2.2), and the first icon represents P100, the second icon represents SD/MMC Card.

Removable  
Disk (H:)

Removable  
Disk (I:)

Fig. 2.2

Fig. 2.3

**Mac OS 9.0 or above (Mac OS 10.3.2 e.g.):** A new icon named "NO\_NAME" (Fig. 2.3) would appear on the desktop of your computer, representing P100.

**NOTE: Under the system of Mac OS 10.0 or above, there are two icons would appear on the desktop of your computer, if you have inserted the SD/MMC Card into P100.**

- 3) Then you can copy, delete or edit data, just as on a traditional hard disk.

### Disconnecting

- 1) **Windows 98/98SE:** Unplug P100 from USB port of the computer after stop transferring.
- 2) **Windows Me/2000/XP** (Windows 2000 e.g.): Click the icon at the taskbar, then click "Stop USB Mass Storage Device - Driver", and click "OK" button in the popup window "The 'USB Mass Storage Device' device can now be safely removed from the system", then you can unplug P100 from the computer safely.

- 3) **Mac OS 9.0 or above** (Mac OS 10.3.2 e.g.): Select the icon(s) representing P100, and click "File" to select "Exit NO NAME" or "Exit" (if SD/MMC card has plugged into P100), then you can disconnect P100 from the computer.

**TIPS:** Please drag P100 icon into Trash, then unplug it on Mac OS 9.0 or above.

### Basic Operations

#### Battery

: The battery does full.

: The battery does exhausted. This icon would flash when the battery does extremely low.

P100 powered by lithium battery. Please connect P100 to adapter for charging, or connect car adapter with cigar-lighter adapter of car for charging to the battery. When the battery does charging, the LED would display red, and green represents finished charge.

Cigar-lighter adapter of car

Please refer to the figure to connect the car adapter to cigar-lighter adapter of car. Netac Technology Co., Ltd. is not responsible for any loss arising out of using this cigar-lighter adapter of car.

#### Power On/Off

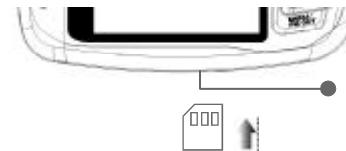

To power on P100, please hold **OK** button, P100 would enter main menu automatically.

To power off P100, please hold **OK** button.

When P100 is in non playing/playing pause/recording/playing game/photographing/USB modes, P100 would power off automatically if there is no operation during the time which is set in "Setup -> POWER OFF" (Please refer to "Setup" for details).

#### SD/MMC Card

Before powering on P100 or when P100 is in main menu status, open the slot convert and insert the SD/MMC Card into P100.

After being inserted the SD/MMC Card, an icon (SD) would appear on the screen of P100. Please refer to "Mode Operations" for details.

**NOTE:** Please create folders such as "MP3", "TXT", "DCIM" and "100MEDIA" in SD/MMC Card before use it, please refer to "Remarks -> Others -> A" for details.

#### HOLD

This function is used to prevent the buttons from being operated accidentally. To lock all buttons please simply lock **HOLD** switch, a lock icon would appear on the screen, and no button would be able to operate. To release the lock status, please

## iMuve-shot

unlock **HOLD** switch. If try to power on while **HOLD** switch is locked, P100 can't be powered on, please unlock **HOLD** switch, then try again.

### Reset

In case P100 doesn't response to any operation, poke the RESET hole to power off P100. You need to restart P100 to complete.

### Firmware Upgrade

Before upgrade, you need to install photographic driver of P100 at first, please refer to "Camera" for details.

## Netac

**NOTE:** Please make sure the free space of P100 is more than 20MB before upgrade, otherwise the upgrade would be fail. Please backup files first because the upgrading would delete all of files which saved in P100.

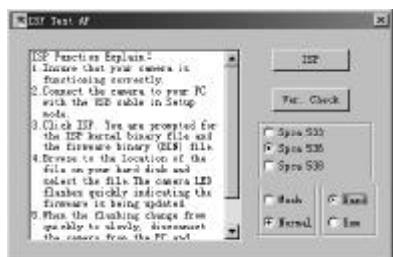

After having installed photographic driver, please refer to the following steps to upgrade.

- 1) Download the latest firmware files from the website <http://www.netac.com>.
- 2) Enter "Setup" menu, set the item of "STORAGE" as "PC-DEVICE", press OK button to confirm. Then connect P100 with the computer through USB cable.
- 3) Insert the installation CD into CD-ROM.
- 4) Double click the "ISP\_V5.2.exe" in "ISP" folder, system would prompt a popup window.

## iMuve-shot

- 5) Select "Normal" and "Nand", then click "ISP" button in the window.
- 6) System would popup a dialogue box, select the files which you have download, click "Yes" button in the popup window, system would upgrade firmware of your P100 automatically.

- 7) After finishing upgrade, "ISP Write File OK." would appear in the window, waiting for about 30 seconds, then unplug P100 from the computer safely. P100 would run new firmware program when powering on again.

## Netac

## RMA Service

- 1) Self check (Over 50% claimed fault can be fixed easily).
  - A) Please check the manual and FAQ on our website <http://www.netac.com> to double-check the failure symptoms you are facing.
  - B) Please check if there is any latest update of software or firmware to your product, especially format tools. If you didn't purchase directly from Netac, please return the goods to the vendor where you purchased from for repair or replacement.
- ANY PHYSICAL DAMAGE, MISUSAGE, OR UNAUTHORIZED DISASSEMBLING OF ANY PART OF THE PRODUCTS WILL LEAD TO WARRANTY VOID. By default, the product is only available for personal and office.
- 2) Obtain RMA (Return to Manufacturer Authorization) number from Netac (Only for Authorized Dealers).
  - A) We send you a RMA Request Form by E-mail upon request.
  - B) Please fill in all related items, like items number, failure symptom(s), purchase date and invoice number on RMA Request Form, E-mail or Fax back to Netac.
  - C) Upon receiving the filled RMA Request Form, we will check the form and warranty period. A RMA number will be issued within 2 working days.

- D) Any RMA number is only valid for 14 days, other than that a new application needs to be filled again.

ANY RETURN WITHOUT PRE-APPROVED RMA NUMBER WILL BE REJECTED OR DELAYED. IT IS A MUST-HAVE FOR ALL RETURN OR REPAIRING OR EXCHANGE OR MISSING ISSUES.

- 3) How to send the defective product(s) to Netac?  
The "Netac RMA Request Form" must NOT be enclosed in the RMA package sent to Netac, but the RMA number is REQUIRED to be written on the top of the box when you send it/them back. The defective product(s) sent to Netac without RMA number will NOT be received, repaired and/or returned.
  - A) Netac don't accept any collect shipment. All RMA shipment must be prepaid.
  - B) Don't make any shipment until having the Shipping Instruction from Netac. Please ask further advice from Netac Customer Service Dept. as bellow before you send out the defective products.
- 4) Contact information
